TECHNICAL AND SOFT SKILLS SUMMARY

- Splunk, Wireshark, Snort, IDS, IPS
 - Linux, Mac, Windows
 - SQL, Python
 - NIST- Cybersecurity framework
 - Attention to details and Adaptability
 - Problem solving and Critical thinking
 - Collaboration and Team player
 - Quick learner
-

TECHNICAL PROJECTS

(<https://github.com/Eddiecybertech/Eddiecybertech/blob/main/README.md>)

Risk assessment project - Assessed existing security structure to identify, evaluate, and address vulnerabilities.

Incident Report analysis project– Followed NIST Cybersecurity Framework to analyzing cybersecurity event.

Nessus Scanning home lab – Networks, devices, and applications scanning to identify security weaknesses, and misconfigurations.

Incident alert triaging – Identified, prioritized, and routed security incident to the correct engineers.

Applying filters to SQL queries project – Using SQL queries to get specific information on login attempts and employee machines.

CERTIFICATES

Google Cybersecurity Professional (July, 2026)

Introduction To Google Cloud Security Operation (SIEM & SOAR)

CompTIA Security+ (Expected Nov, 2026)

EDUCATION

Rutgers University Newark NJ: Bachelors in Social work | Minor in Psychology (May,2022)

IMFT: Associate Degree in Computer Science (Dec, 2009)

PROFESSIONAL EXPERIENCE

Tax Examiner, Department of Labor, Trenton, NJ (Jan, 2025 – Present)

- Investigating and resolving report discrepancies, and suspected Social Security fraud through rigorous cross-examination of internal and external data sources and application of governing tax frameworks.
- Spearheading a systematic remediation of 6,000+ special accounts, auditing data integrity across systems to ensure complete accuracy and regulatory alignment in financial reporting

Probation Officer, Superior Court, Burlington, NJ (Oct, 2022 – Jan, 2025)

- Executed comprehensive background investigations and formal risk assessments for 100+ high-risk individuals.
- Enforced strict data privacy and confidentiality across 100+ sensitive client files, ensuring full adherence to PII compliance standards.

Electronic Tech, B&W TEK, Plainsboro NJ (Oct, 2021 – April, 2023)

- Spearheaded process improvement initiatives that streamlined team testing workflows, improving operational efficiency
- Streamlined test backlog workflows with cross-functional teams to test 10+ spectrometer units per day, boosting daily output by 20%
