
EDIDIONG EDET

Cybersecurity Analyst | Cybersecurity-Focused IT Professional

Burlington, New Jersey | 862-241-2959 | www.linkedin.com/in/edidiongedet

Detail-oriented Junior Cybersecurity Analyst with a strong foundation in threat detection, vulnerability assessment, regulatory compliance, and system monitoring. Combines practical hands-on training from the Google Cybersecurity Professional Certificate, Home Labs, and TryHackMe with a proven background in systematic data auditing, root-cause investigation, and quality assurance.

SKILLS

- **Technical skill:** Microsoft 365 suite, Linux/Mac/Windows, Splunk, Snort, IDS/IPS, Nessus, Python, HTML, Technical Skill.
- **Soft skill:** Communication, People Skills, Problem Solver, Attention to Detail, Quick Learner

TECHNICAL PROJECTS {<https://github.com/Eddiecybertech>}

- **Risk Assessment Project** — Assessed existing security structure to identify vulnerability.
- **Incident Report analysis project** — Used NIST Cybersecurity framework to analyze cybersecurity event
- **Nessus Scanning home lab** — Used Nessus to identify security flaws and misconfigurations.
- **Applying filters to SQL queries** — Used filters to get specific information on login attempts

PROFESSIONAL EXPERIENCE

Department of Labor

Jan 2025 – Present

Tax Examiner

- Lead the systematic remediation of 6000+ employer accounts by conducting data integrity assessment across multiple applications.
- Coordinate with cross-functional stakeholders to resolve complex account discrepancies, and mitigate operational risk.

Superior Court

Oct 2022 – Jan 2025

Probation Officer

- Secured 100+ sensitive client files by enforcing strict confidentiality and data protection, ensuring the secure handling of Personally Identifiable Information (PII).
- Analyze complex behavioral patterns and anomaly indicators to anticipate potential risks and prevent policy violations.

B&W Tek

Oct 2021 – Apr 2023

Firmware Tester

- Accurately recorded test data and communicated findings to engineers and the quality control team for more than eight spectrometers.
- Collaborate with cross-functional teams to test, deploy, and validate firmware security patches of over 15+ devices daily.

Data Online

Electronic Test Tech

April 2018 – Oct 2021

- Configured, tested, and validated remote wireless networks for over 12+ remote monitoring units per day, streamlining telemetry collection and real-time data transmission.
- Perform root-cause analysis on critical technical anomalies of over 10+ devices, drafting detailed failure reports and actionable remediation guidance for engineering teams.
- Maintain rigorous quality compliance and audit documentation across testing lifecycles, ensuring alignment with regulatory standards and baseline security requirements.

EDUCATION & CERTIFICATIONS

Google Cybersecurity Professional

Earned July 2026

Practical Security Investigation with Splunk, Wazuh

Earned September 2026

Intro to front-end development

Earned April 2026

CompTIA Security+ (Expected Nov 2026)

Bachelor of Social Work (BSW)

Rutgers University, Newark, NJ | May 2021

Associate in Computer science.

IMFI, Uyo | Nov 2009
